A lighthouse on a rocky island at sunset. The lighthouse is white with a red stripe and a glowing light at the top. A beam of light shines from the lighthouse across the water. The sky is a mix of orange, yellow, and purple.

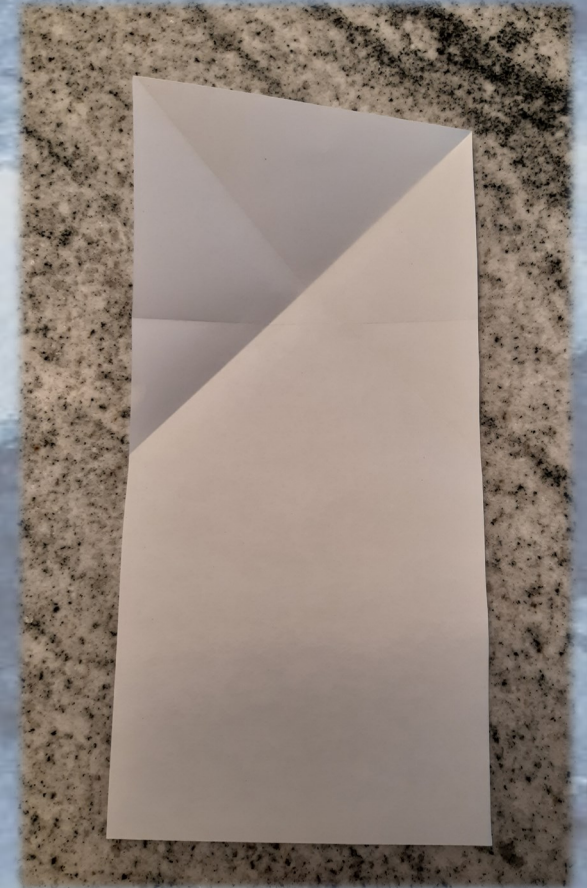

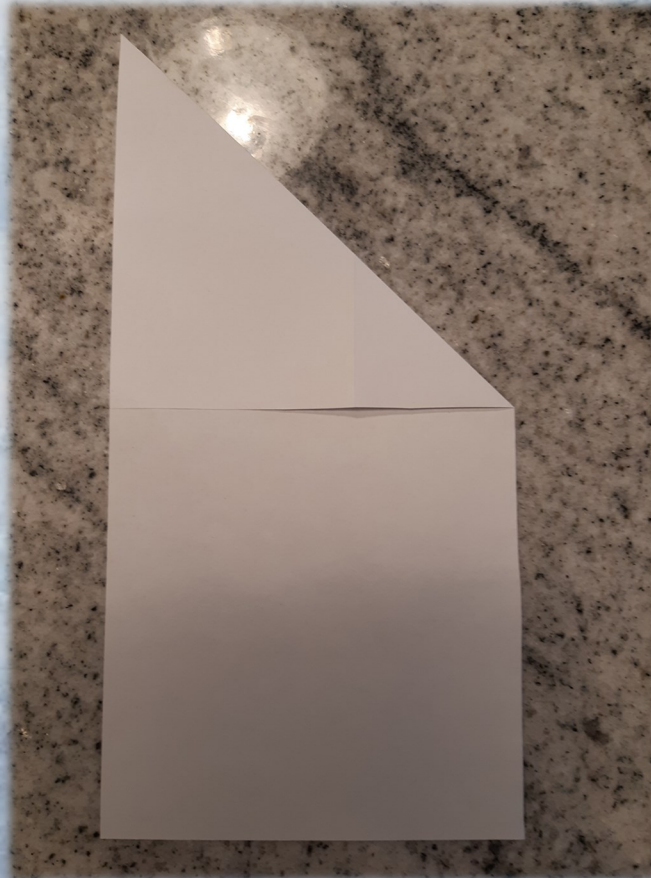

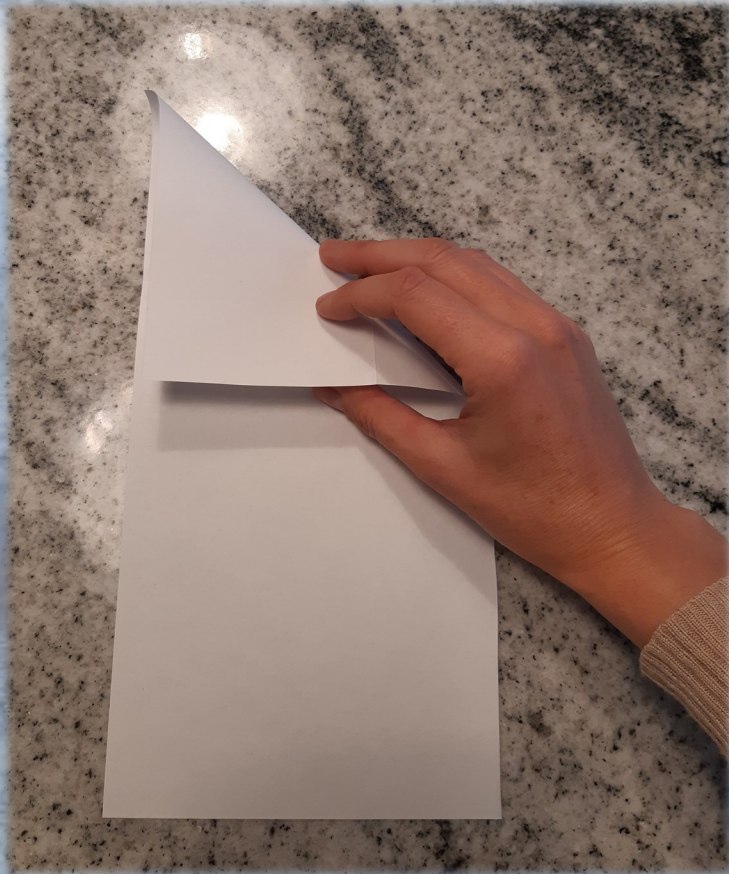

# The Sister City Lighthouse Project How to Make an Origami Lighthouse!

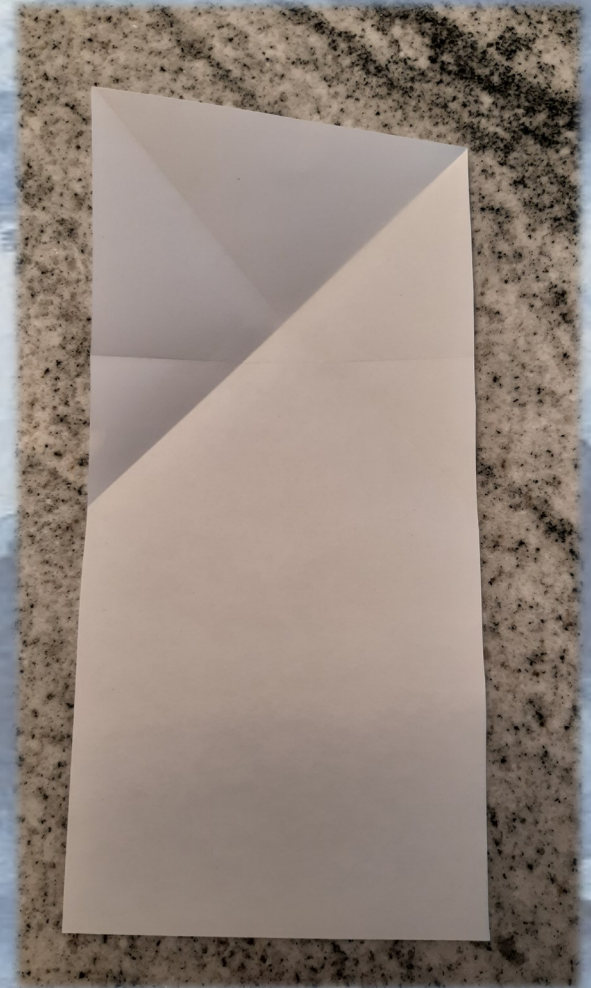

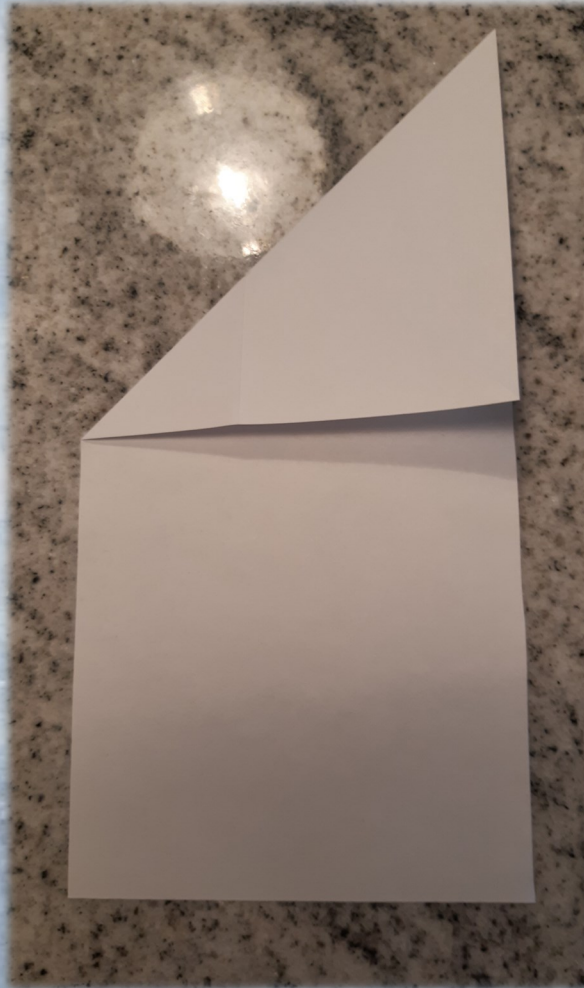

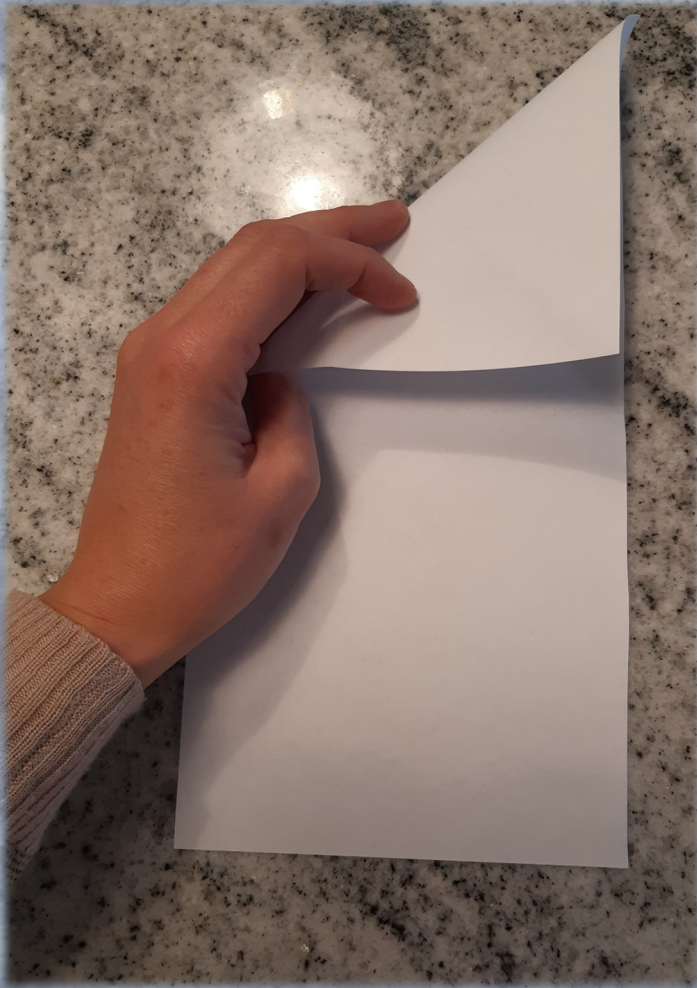

**Step 1:** Take a long rectangular sheet of paper — the longer your sheet is the taller your lighthouse will be. Fold about  $\frac{1}{3}$  downward to make a crease and unfold (to make this crease more accurately skip this step and do it after step 3).

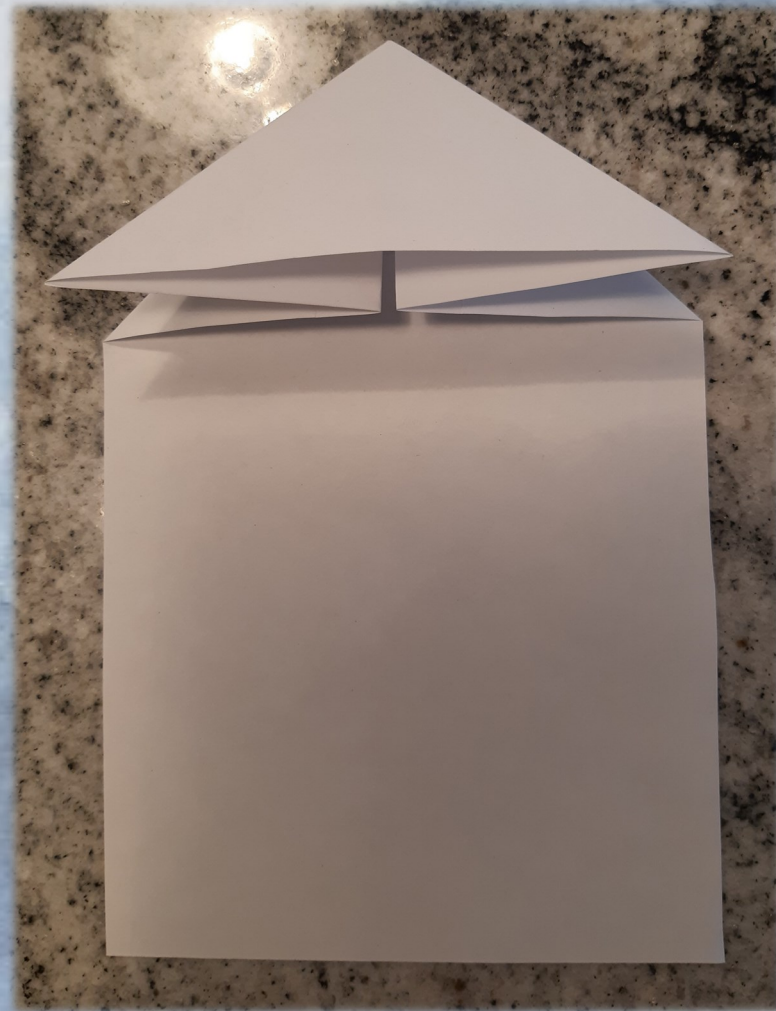

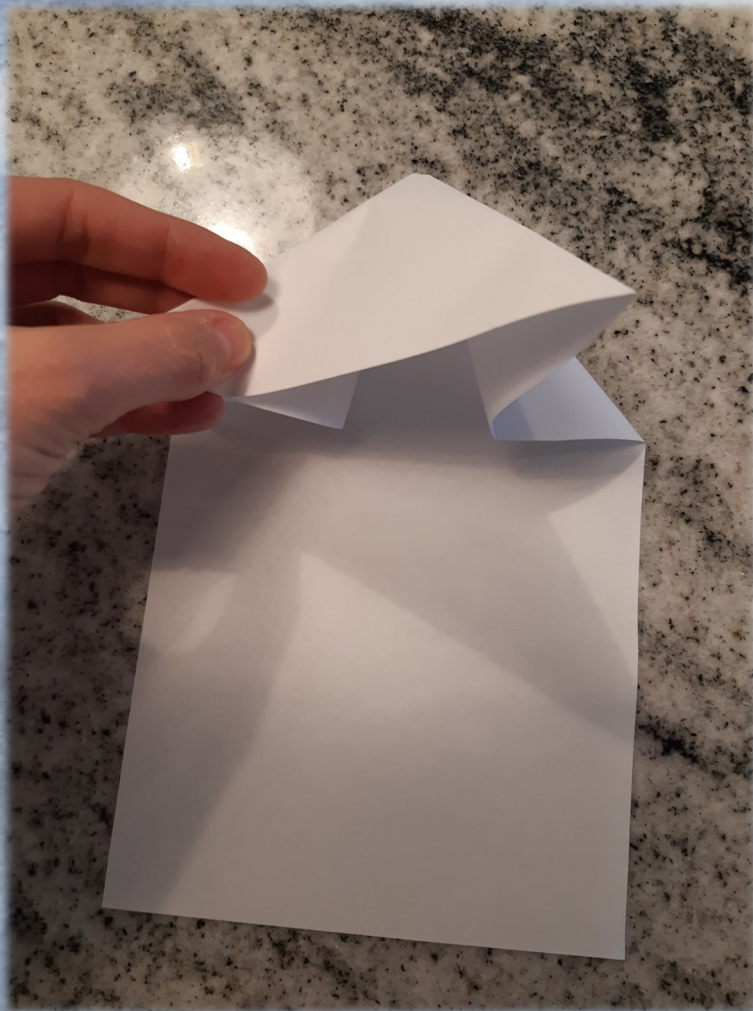

**Step 2:** Fold the top edge to the left edge and unfold

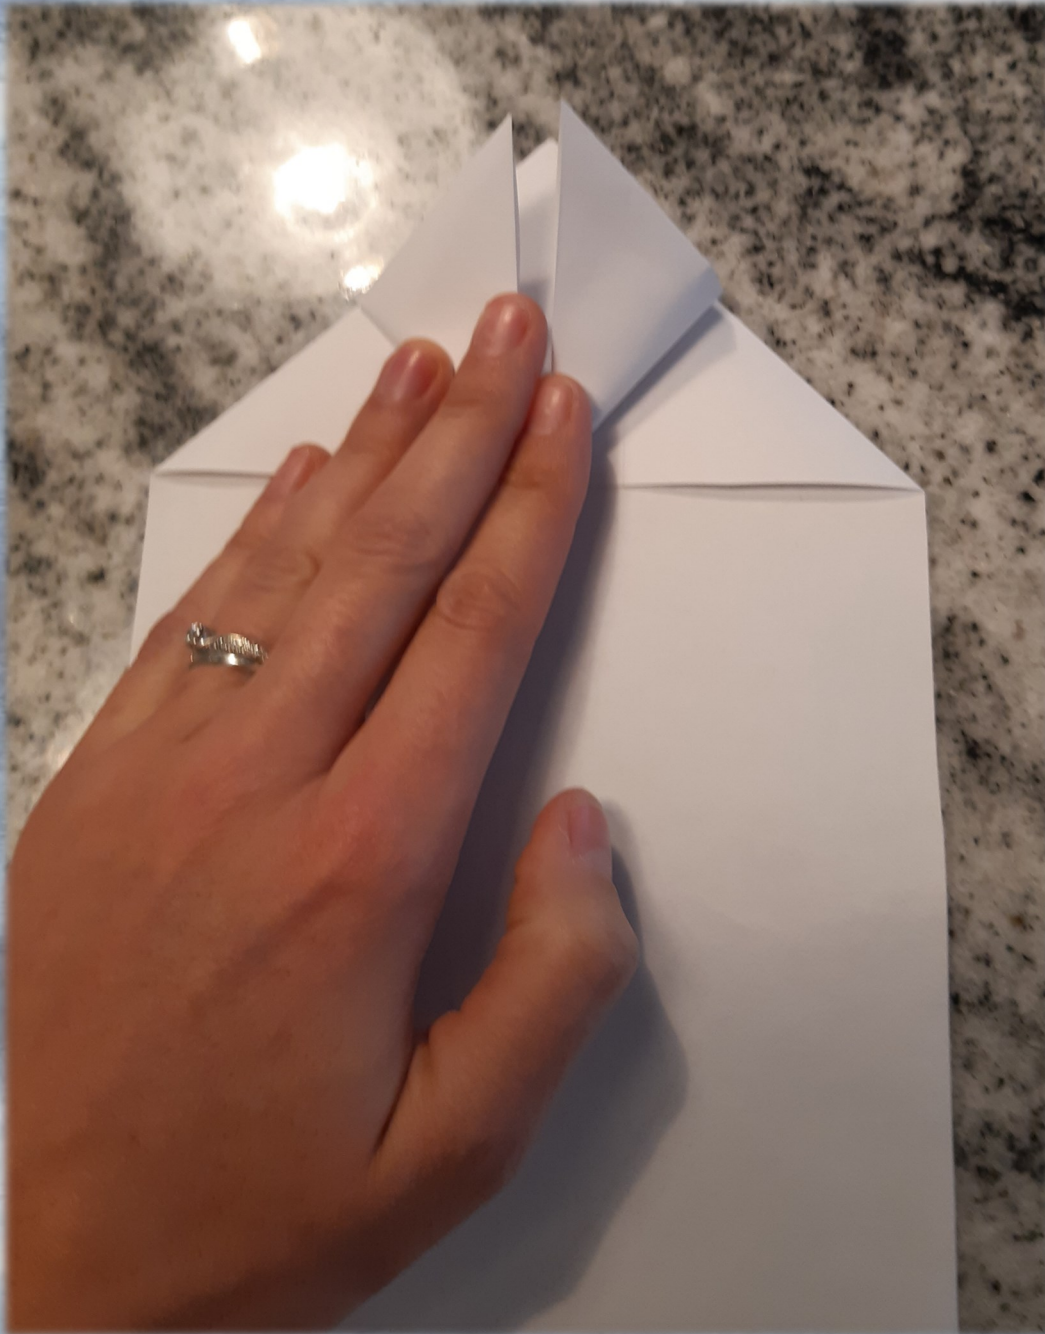

**Step 3:** Fold the top edge to the right edge and unfold.

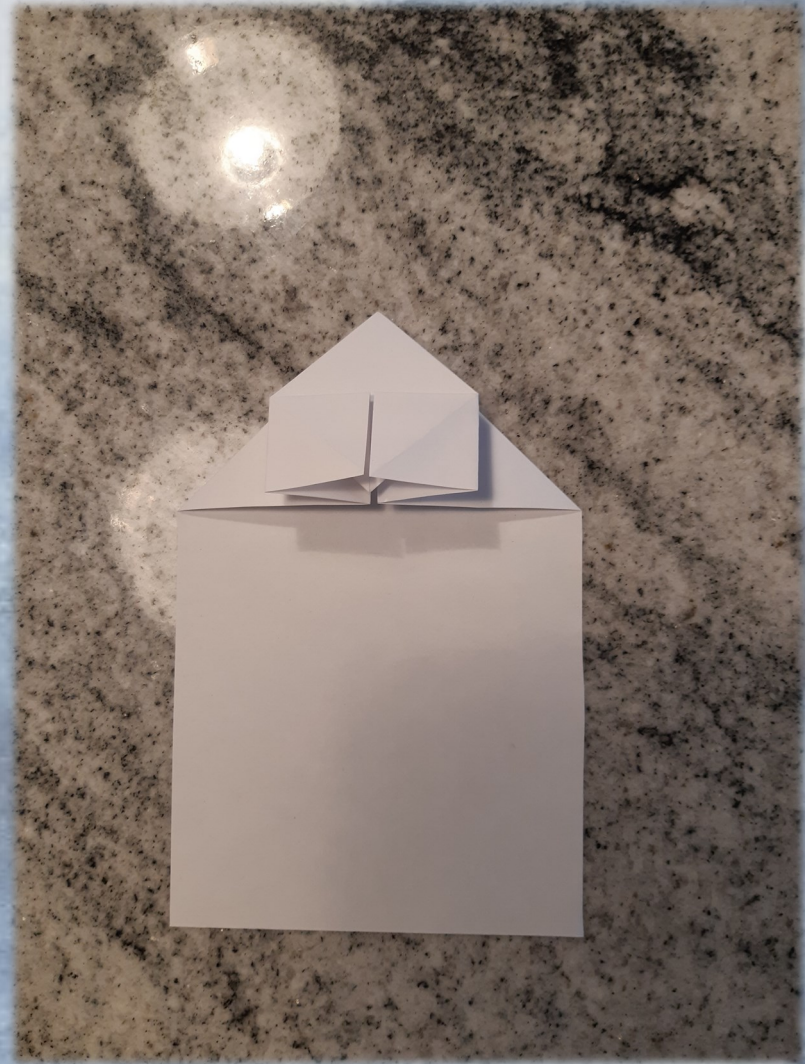

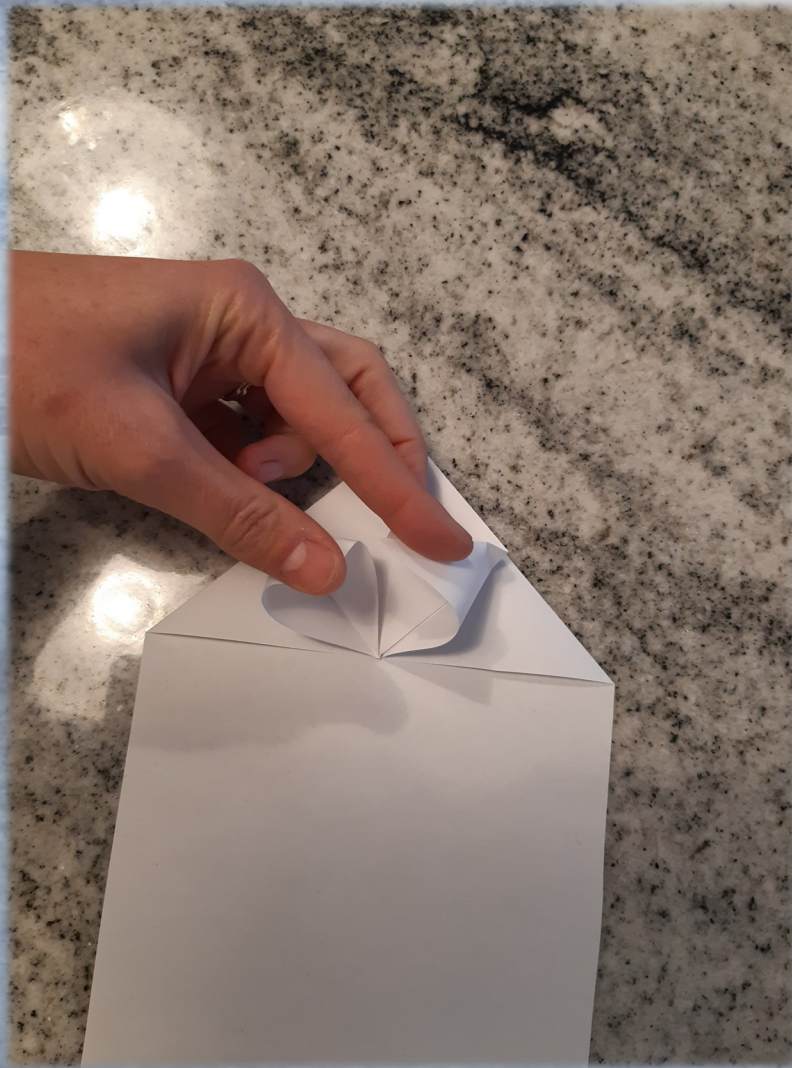

**Step 4:** Fold the top part of the item along the creases you've made.

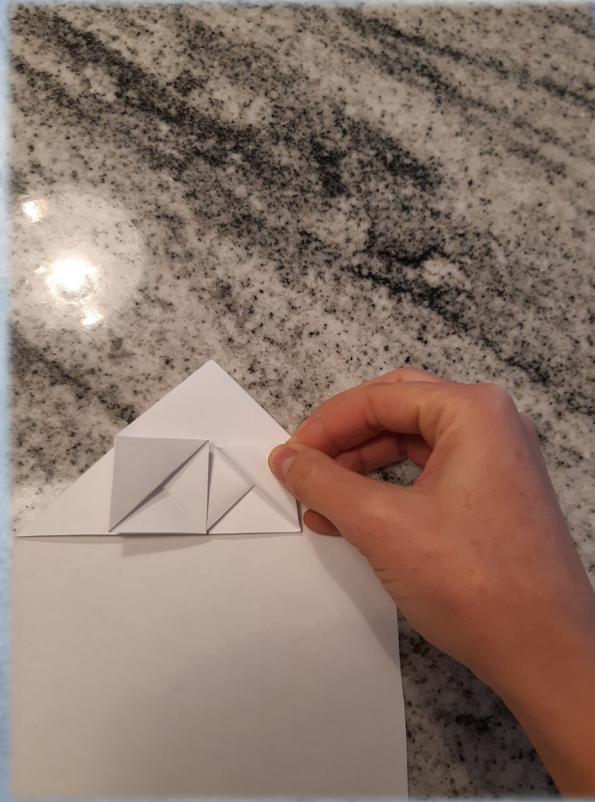

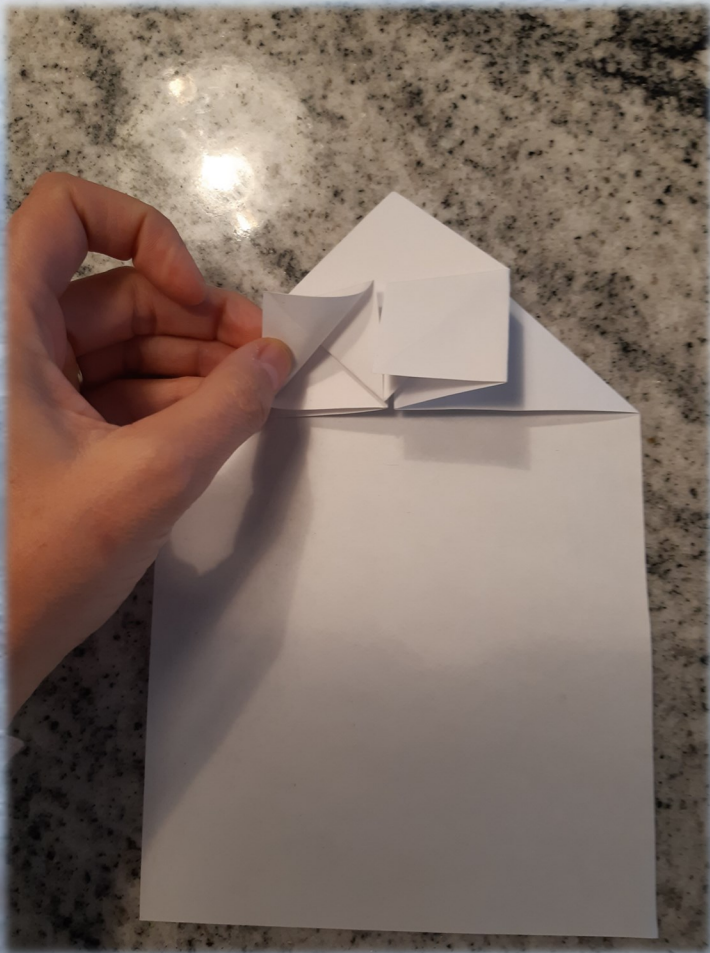

**Step 5:** Fold the upper layers of the side corners to meet the centre line.

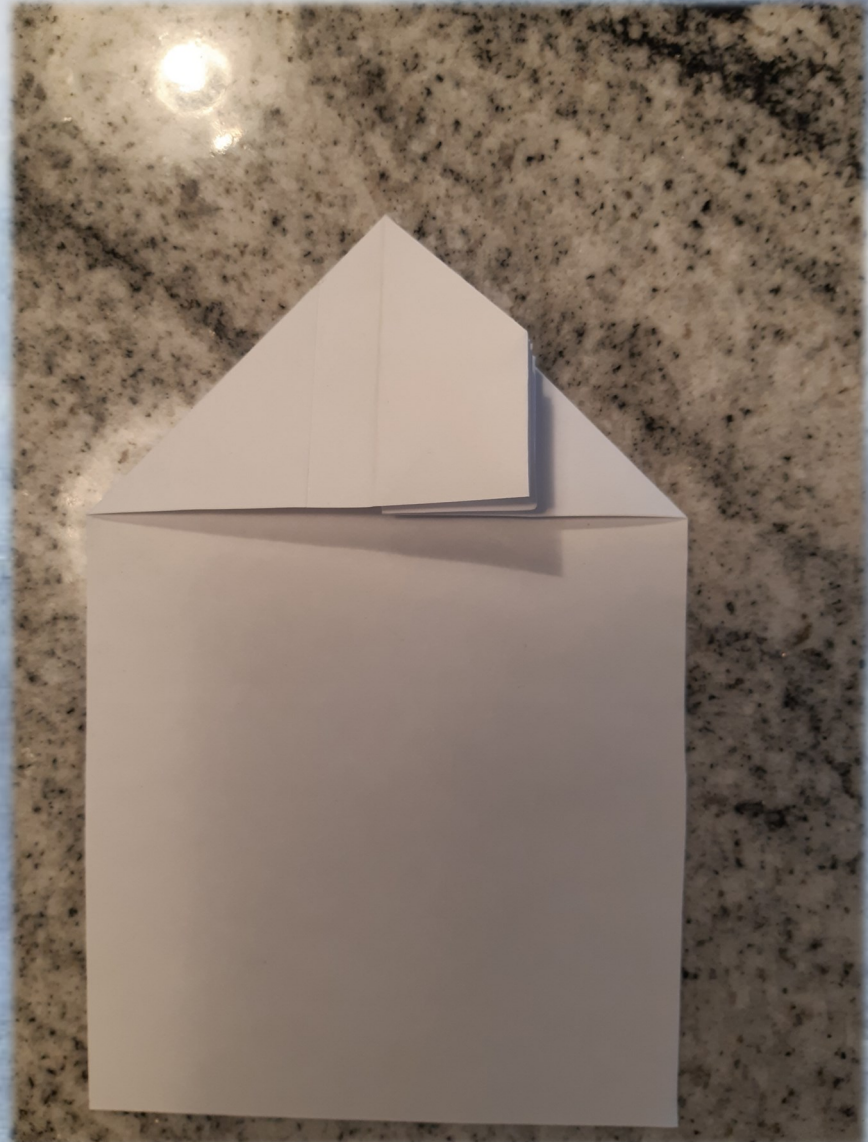

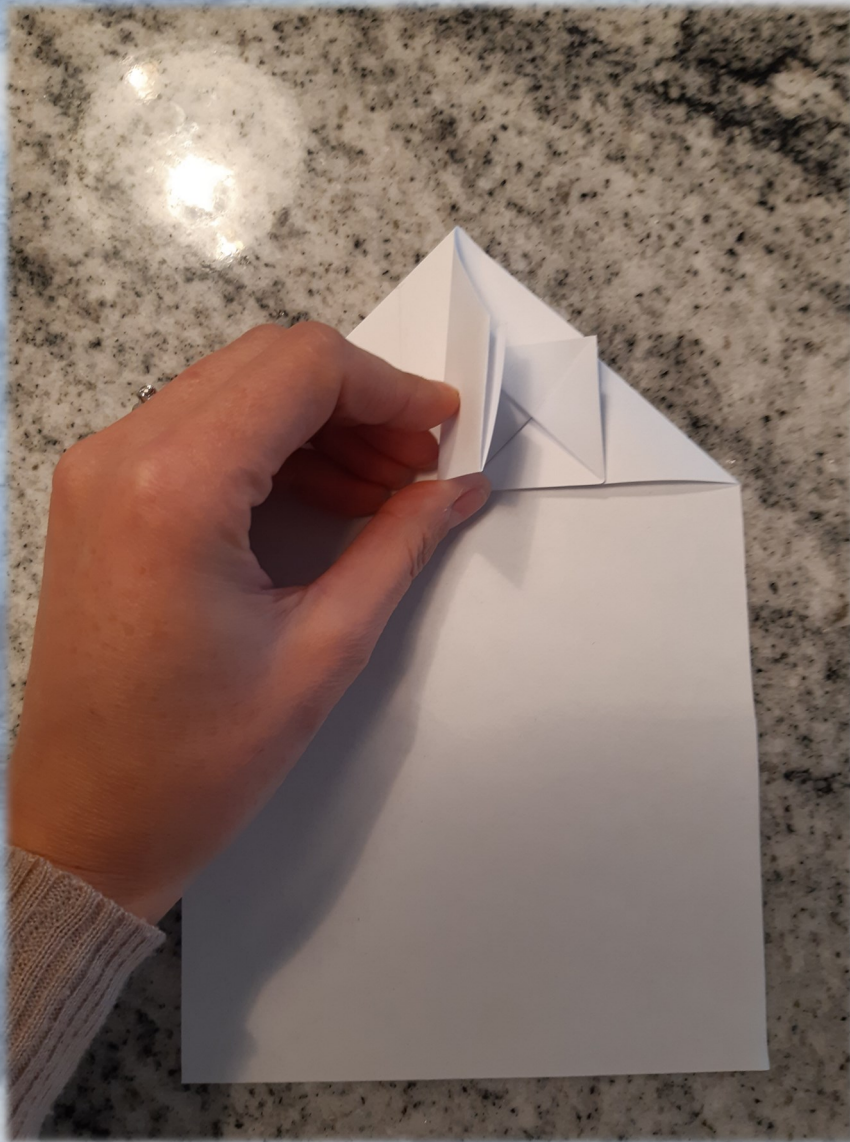

**Step 6:** Open the central triangles and fold them downward to make two squares

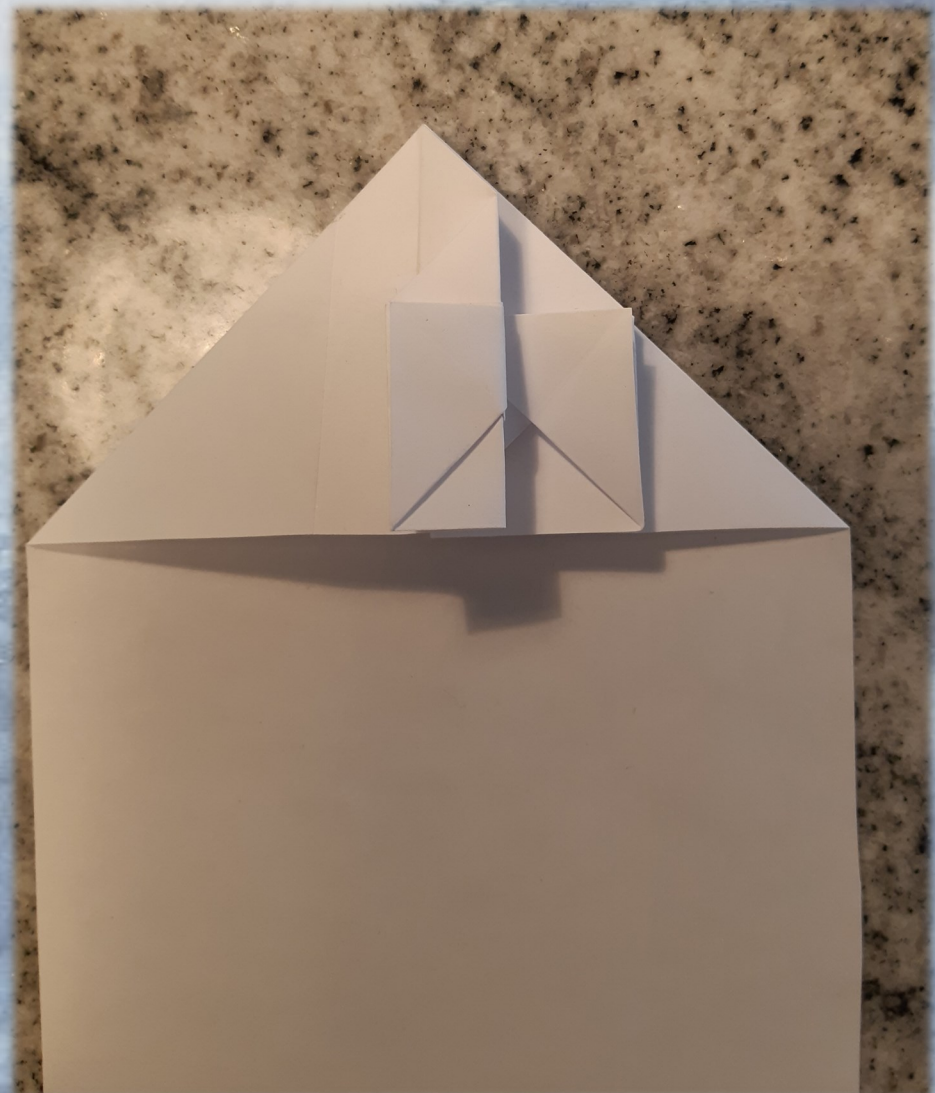

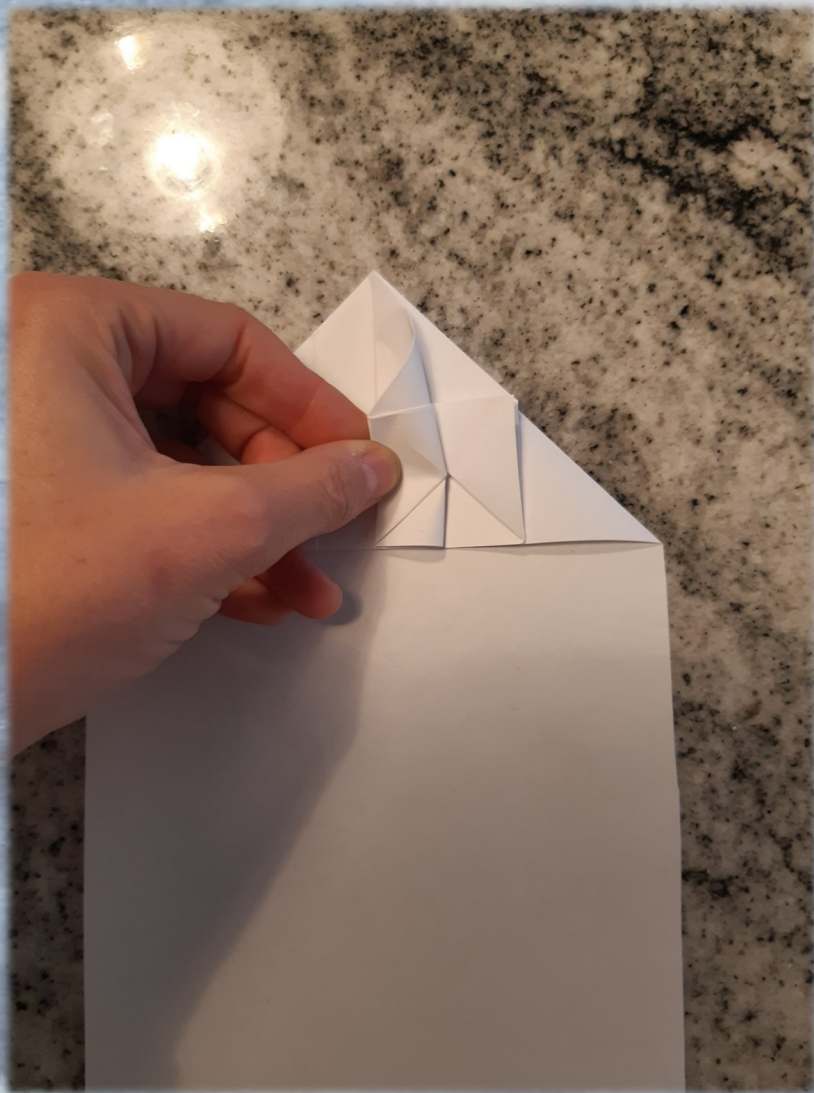

**Step 7:** Fold the central edges of the squares to their top edges.

**Step 8:** Fold the left flap to the right

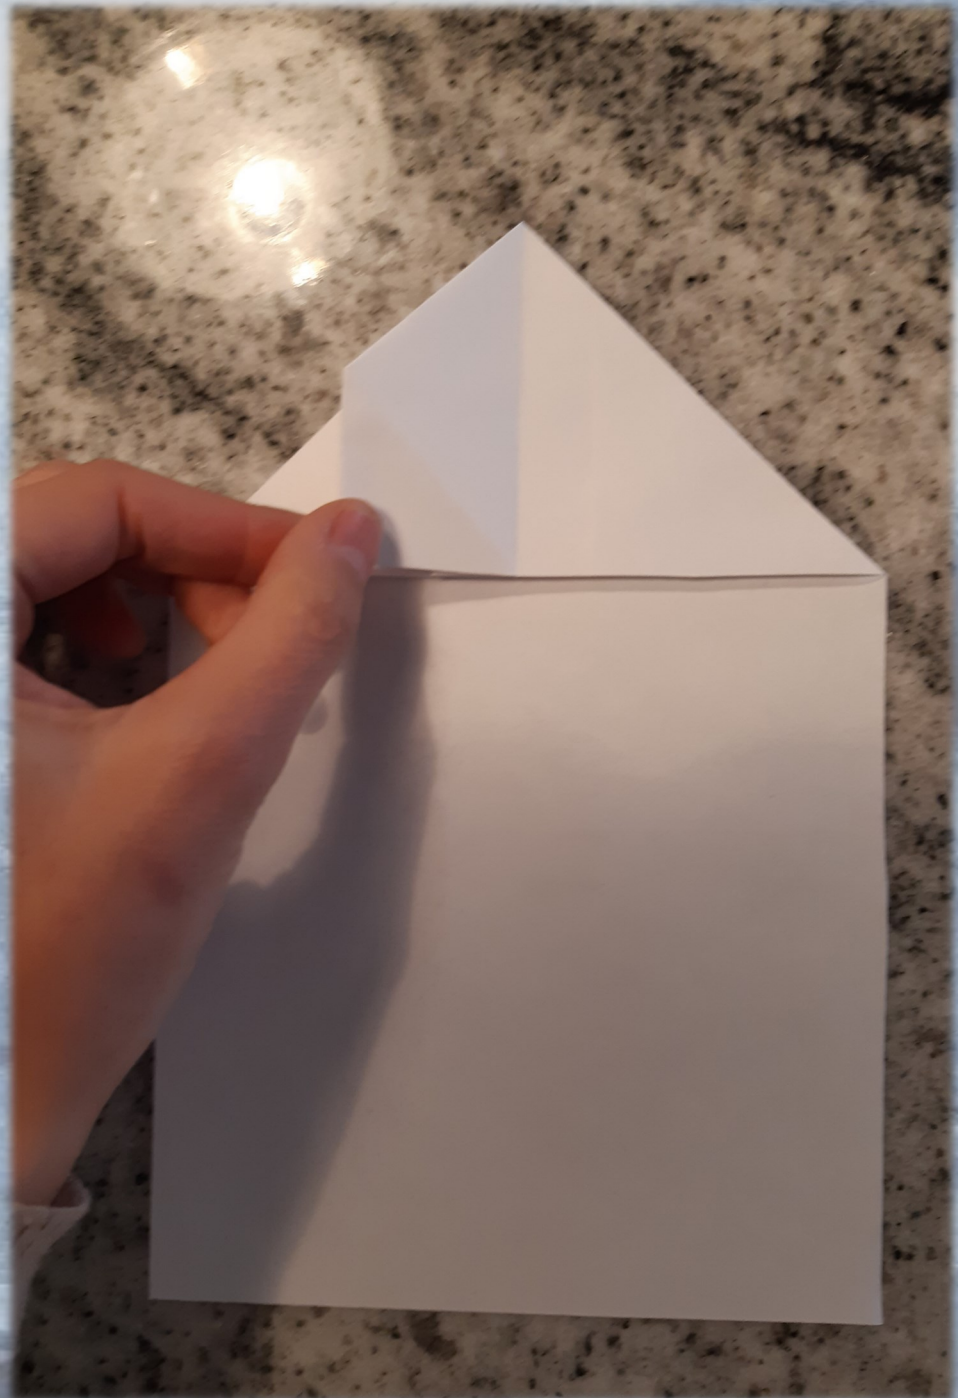

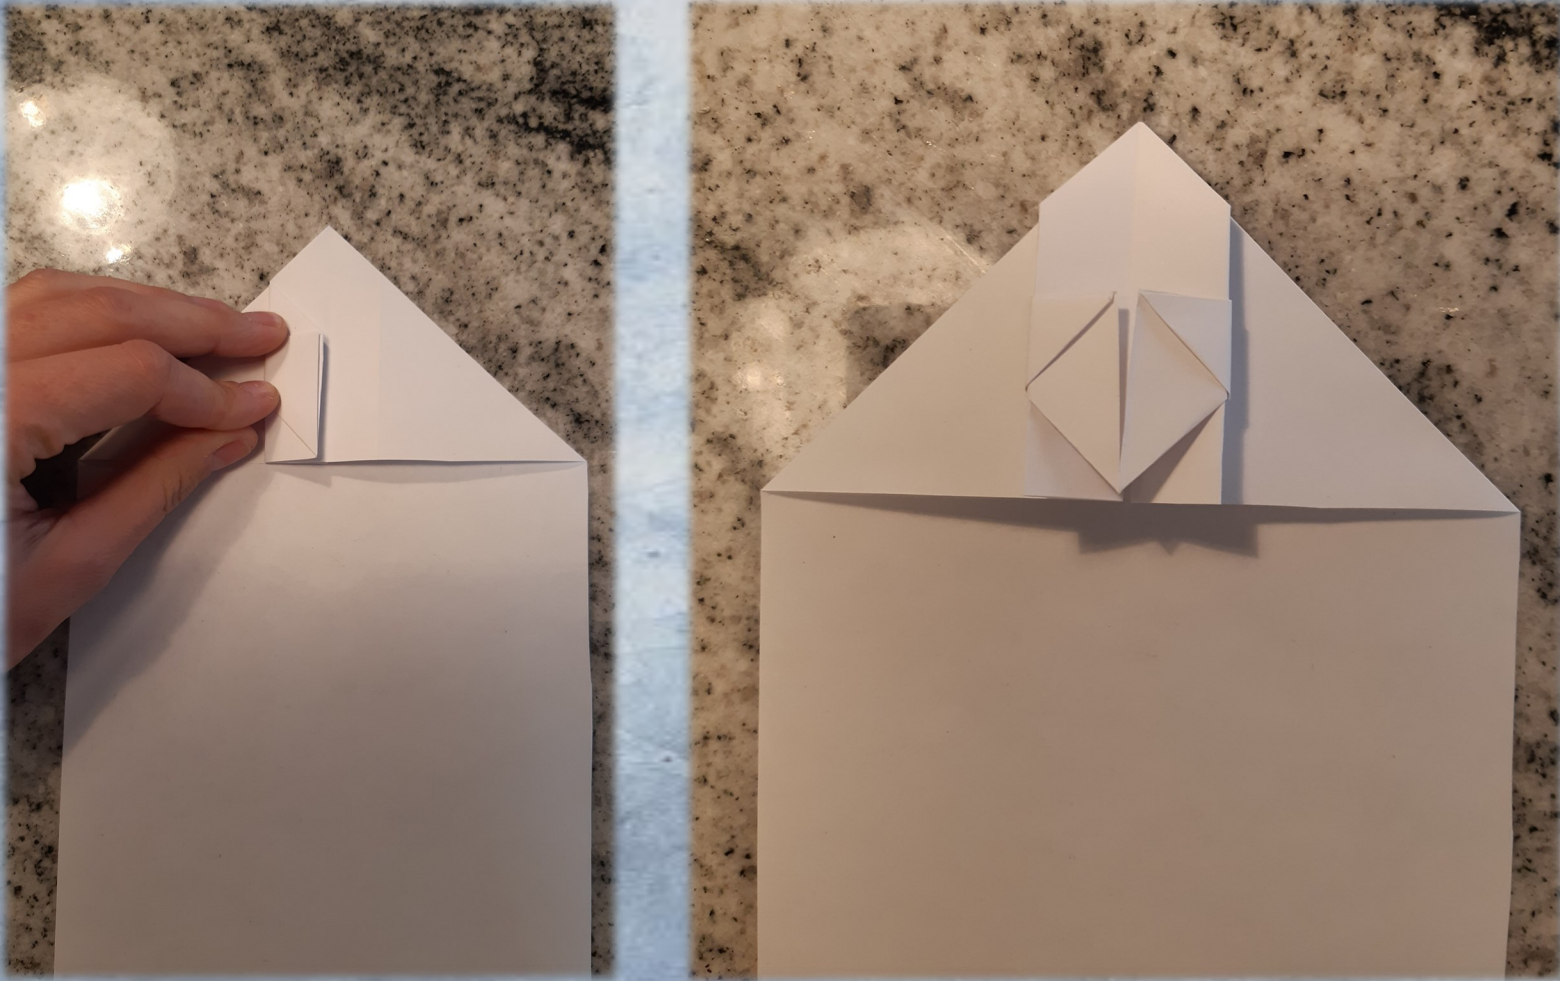

**Step 9:** Fold the flap in half and fold it to the left

**Step 10:** Fold the  
right flap to the  
left.

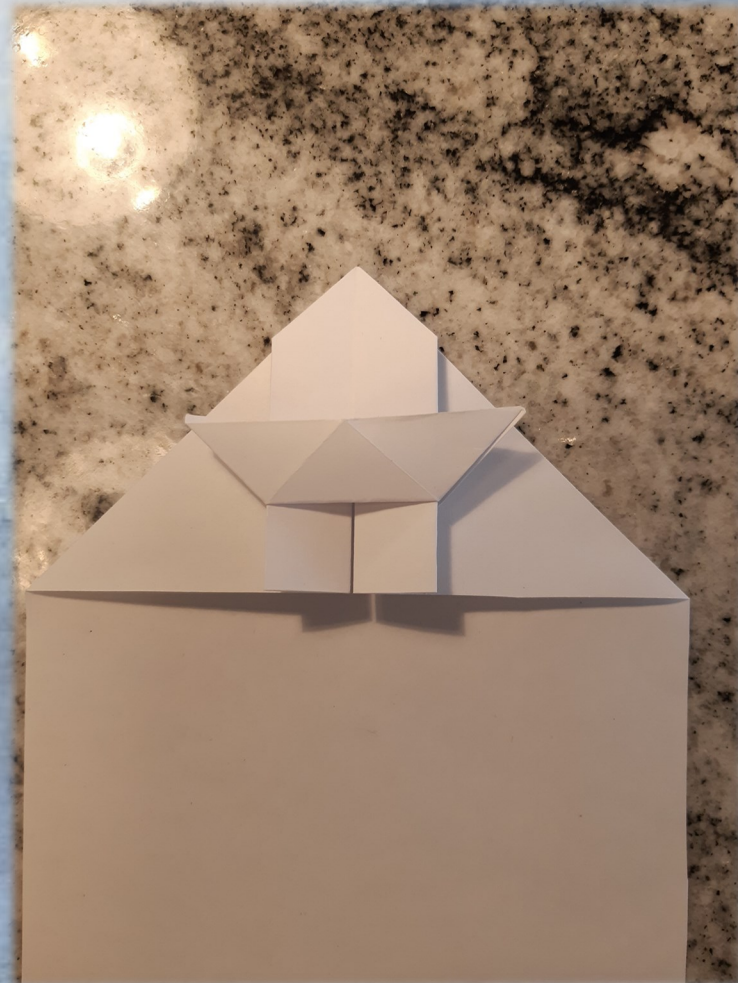

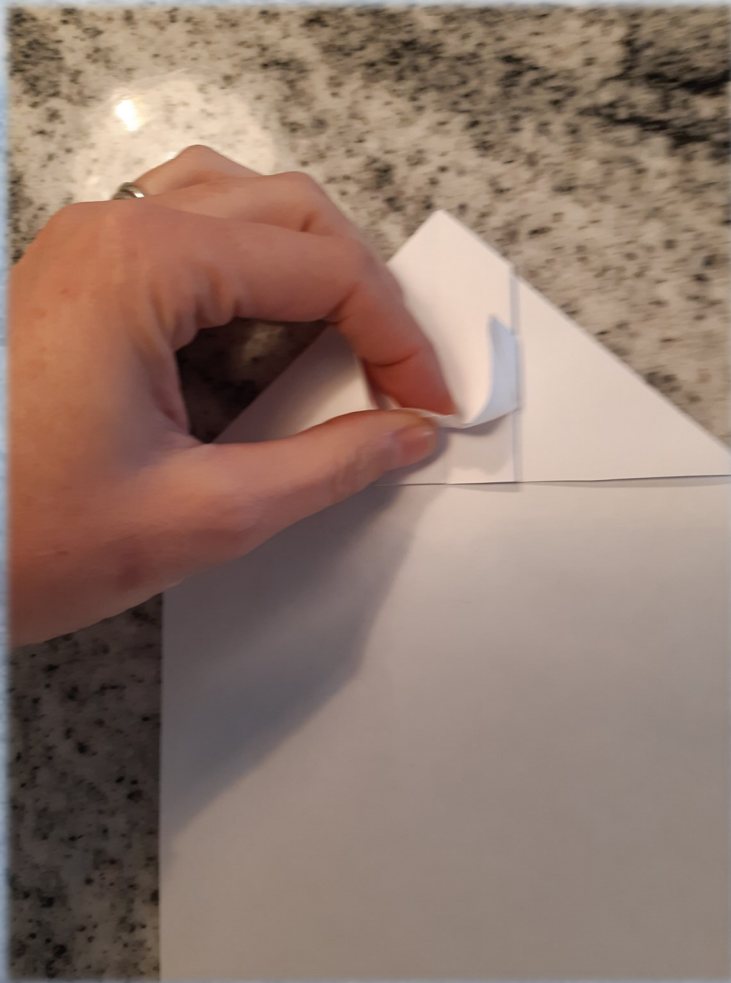

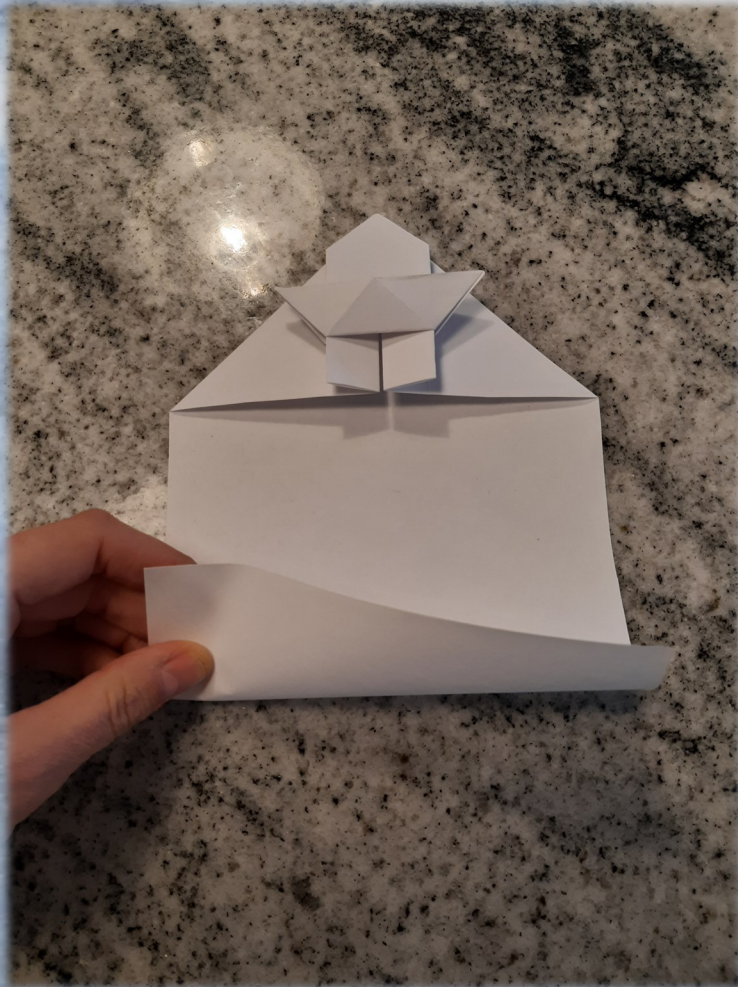

**Step 11:** Fold the flap as previously .

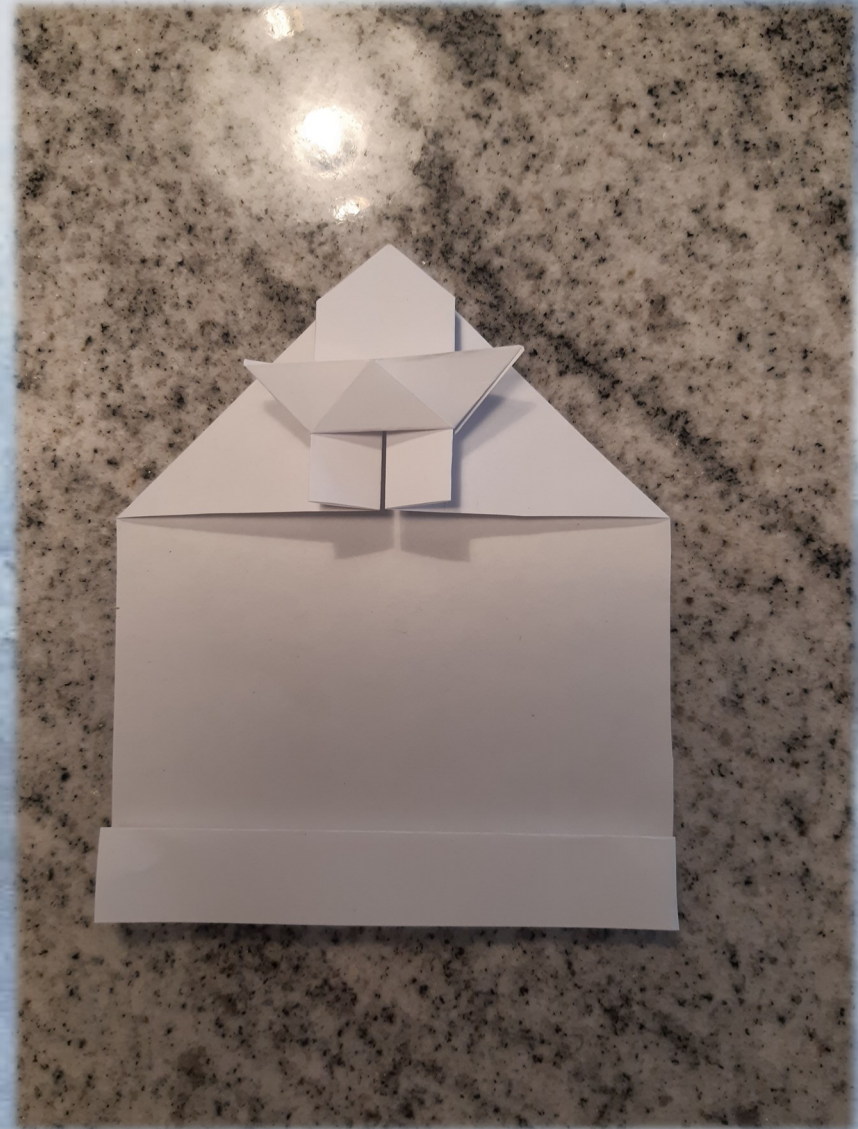

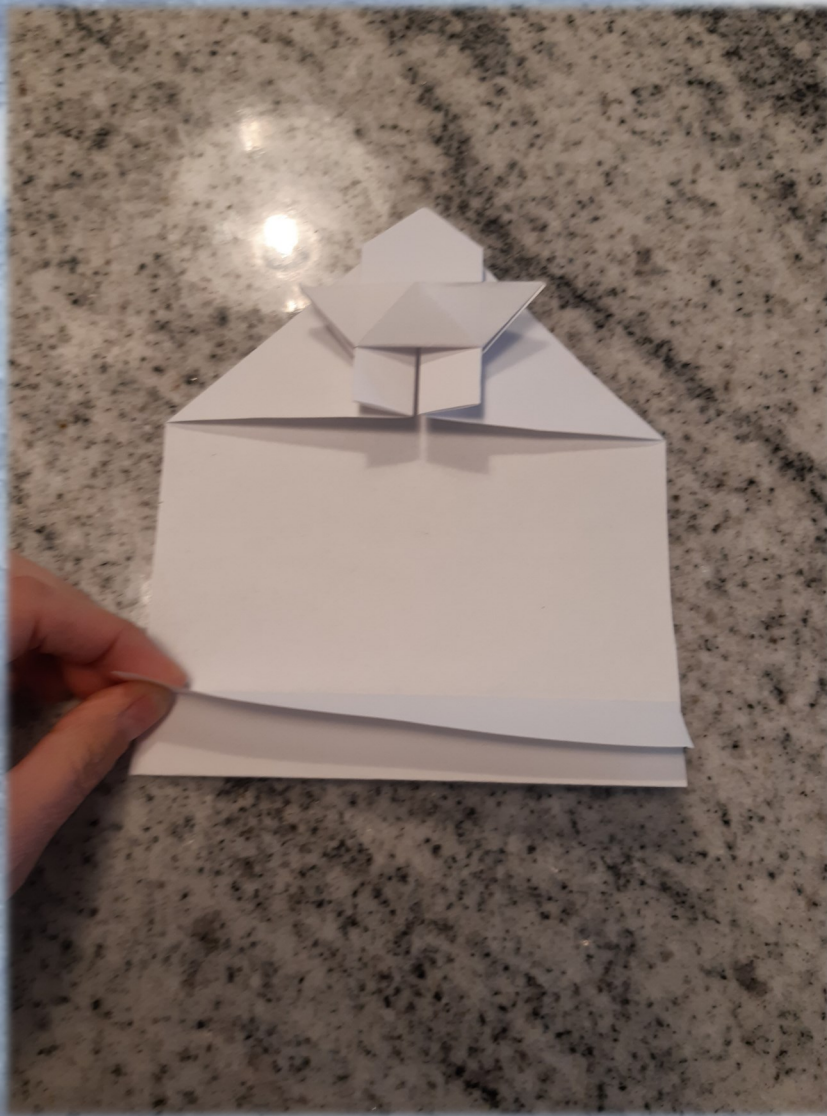

**Step 12:** Bring the inner corners away from each other

**Step 13:** Fold the bottom part of the item upward

**Step 14:** Fold the bottom flap in half downward

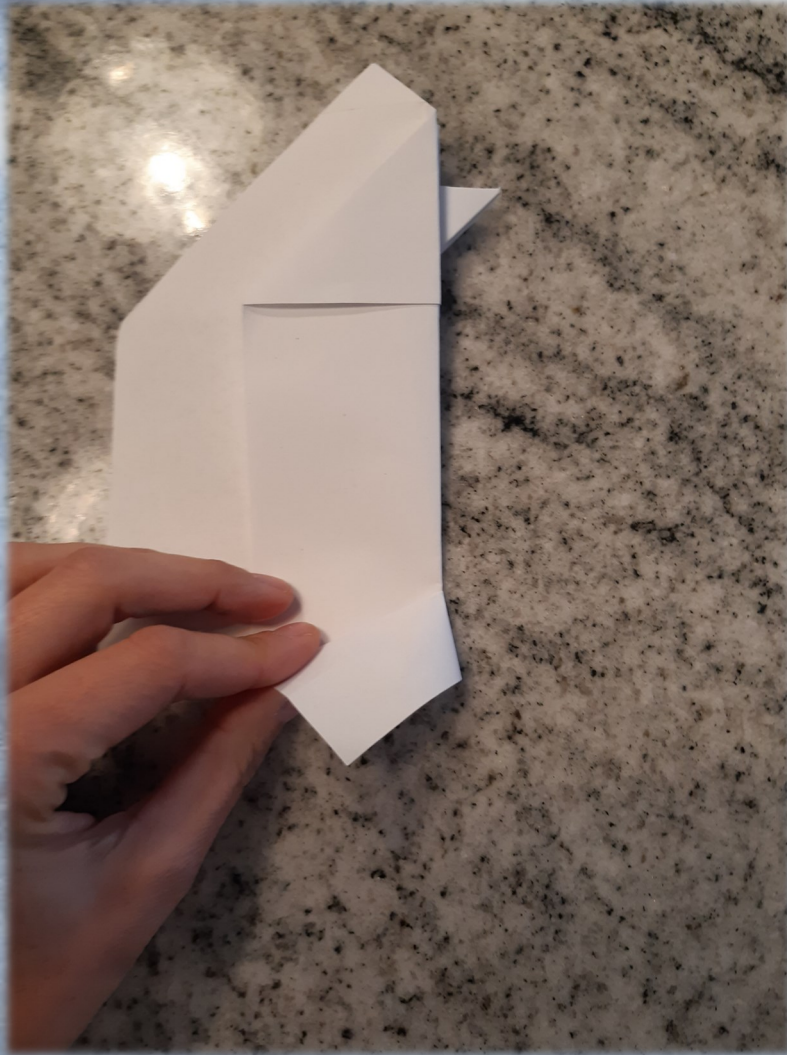

**Step 15:** Fold the left part backward

**Step 16:** Turn the item over

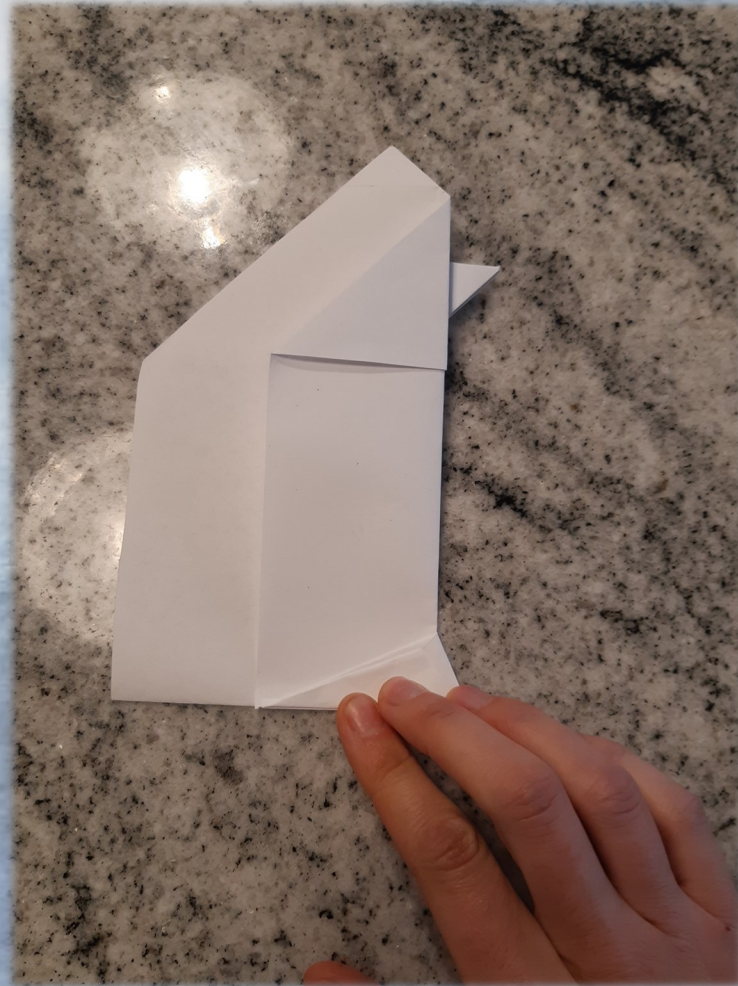

**Step 17:** Expand the bottom part and pull it downward, folding slantwise

**Step 18:** Fold the left edge of the flap to the bottom line of the item; then fold the flap upward along the bottom line of the item.

**Step 19:** Fold the left part of the item to the right.

**Step 20:** Expand the bottom part, pull it downward and fold slantwise.

**Step 21:** Fold the bottom part as previously.

**Step 22:** Turn the item over. The lighthouse is complete! You can now colour or paint your lighthouse .
